GitHub: github/teja
Email: krishanatejajayaprakash@gmail.com
Mobile: +91-7569211719

Skills

- **Languages**: C++, JavaScript, C, PHP
- **Frameworks**: CSS, Bootstrap, Node.js, React , HTML
- **Tools** : GitHub, VS Code
- **Databases:** MySQL, MongoDB
- **Soft Skills**: Problem-Solving, Adaptability, Creativity, Client Handling

Work Experience

Freelancing Nov '25 - Dec '25

Created a full-stack web application for a small busine ss, managing frontend, backend, and payment
Project value ₹5000 GST no: 37AAACT0686N1ZV

Projects

Farmer Portal – Scheme Eligibility System Github July '25 - Aug '25

- Designed and built a farmer-centric web application that helps users instantly check their qualification for multiple government welfare schemes, enabling faster access to essential benefits.
- Engineered a reliable server-side system using PHP to handle farmer data, apply eligibility rules, and precisely associate users with applicable schemes.
- Crafted a clean and easy-to-navigate interface that displays eligibility outcomes in a structured and understandable format, enhancing usability for farmers with diverse technical background

Tech: PHP, MySQL, HTML, CSS, Scheme Matching Logic.

Mitai garage – Sweets E-Commerce Platform Github Nov '25 - Dec '25

- Addressed the lack of an online presence for a traditional sweets business by conceptualizing a digital platform for product browsing and order placement.
- Developed a responsive full-stack application using HTML, CSS, JavaScript, Node.js**,** and Express.js, integrating REST APIs and a secure payment gateway.
- Successfully delivered a user-friendly e-commerce solution that simplified online ordering, improved customer accessibility, and enhanced overall business efficiency.

Tech: HTML, CSS, JavaScript, Node.js, Express.js, REST APIs, Payment Gateway Integration.

Training

CodeQuest: DSA Summer Bootcamp Jun '25 – Jul '25

- Gained **hands-on experience with core Data Structures** such as arrays, linked lists, stacks, queues, trees, graphs, and hash maps using C++, applying them to solve real-world coding challenges.
- Strengthened understanding of **fundamental and advanced algorithms**, including sorting, searching, dynamic programming, greedy techniques, and recursion, with a focus on writing optimized solutions.
- Improved **problem-solving and logical thinking** by consistently solving medium to complex problems on platforms like LeetCode, CodeChef, and HackerRank during the training period.

Certificates

- Computational Theory: Language Principle & Finite Automata Theory |Udemy | Link — Aug '25
- Master Generative AI & Generative AI tools | Udemy | Link — Aug '25
- The Complete Java Certification Course | Neo-Colab | Link — Apr '25

Achievements

- Achieved 5-star rating in C++ on HackerRank . — Jul '25
- Solved 90+ DSA problems on LeetCode — Nov '25
- Advanced to Round 2 of the Tech India Hackathon after successfully clearing the initial screening and evaluation phase. — Feb '23

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering CGPA: 6.80 — August '23 - present
- **Narayana BDVM** — Nellore , A.P
  Intermediate; Percentage: 83 — April '22 - March '23
- **V.B.R RESIDENTIAL SCHOOL** — Nellore, A.P
  Matriculation; Percentage: 99.3 — April '20 - March '21
